DETAILED ACTION

1. This is in response to communication filed on October 6, 2003. Claims 1-16 and 19-34 were amended. Claims 17-18 and 35-36 were canceled. Claims 1-16 and 19-34 are now pending in the instant application.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

3. Claims 1-16 and 19-34 are rejected under 35 U.S.C. 102(e) as being anticipated by Hernandez et al. (USPN 5,752,050; hereinafter Hernandez).

As per claims 1, 4, 6, 9, 11, 14, 19, 22, 24, 27, 29, and 32, Hernandez discloses the claimed invention including an information processing apparatus to drive a plurality of driving units according to data to be processed, comprising: a detection unit (e.g. event filter 11; col. 3, lines 18-25) to detect a type of data to be processed; a plurality of power control units (e.g. pm

Art Unit: 2111

handlers 17; fig. 1), each of which to control a corresponding driving means (15; fig. 1; cols. 3-4) according to the type of data to be processed; wherein the plurality of driving means (e.g. 15) “is not included in a processor” (col. 1, lines 7-20; see also cols. 4-8 for software).

As per claims 2, 5, 7, 10, 12, 15, 20, 23, 25, 28, 30, and 33, Hernandez discloses each of the plurality of power control units (e.g. PM handlers 17) that controls a power source which supplies power to the plurality of driving units [e.g. col. 2, lines 60-67; col. 3, lines 40-65].

As per claims 3, 8, 13, 16, 21, 26, 31 and 34, Hernandez discloses wherein the power control unit supplies power to each of the plurality of driving units that can process the data to be processed, and stopping a supply of power to each of the functional units that cannot process (functional units not currently being used) the data to be processed (e.g. col. 3, lines 65 et seq. bridging col. 4, lines 1-67).

Response to Arguments

4. Applicant's arguments with respect to claims 1-16 and 19-34 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO**

Art Unit: 2111

MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
